

# Dietary Management

- Certificate of Proficiency
- Technical Certificate
- A.A.S.

**Courses include but are not limited to:**

- Field Experience I
- Food Safety and Sanitation
- Managing Food Service Programs
- Field Experience II
- Diet Therapy
- Field Experience III
- Food Services Administration
- Nutrition

**Description:**

The Dietary Management program is designed for individuals who wish to obtain the Certified Dietary Manager (CDM) credential. The program follows the curriculum prescribed by the Dietary Managers Association (DMA), which is the national professional organization for dietary managers.

The Dietary Management program consists of classroom instruction and field experiences. Field experiences will be scheduled on an individual basis. Students working in a health-related facility may be able to complete their field experience at their places of employment. Successful completion of this program will enable the student to take the exam to become a Certified Dietary Manager.

**After UACCM**
